Sustainable Utility Operations

The TDPUD Board of Directors, in 2020, adopted the TDPUD Strategic Plan which guides everything the utility does, from goals and objectives to budgets and community engagement. Included in the strategic plan are Board strategic initiatives that explore how TDPUD can best utilize its expertise and services to improve the quality of life in our community. In 2023, during the mid-cycle review of the strategic plan, the board updated the strategic initiatives to be: Community Broadband, Service Reliability and Safety, Net Carbon Reduction, and Local Watershed Stewardship. While all the Board strategic initiatives have a sustainability aspect, the Net Carbon Reduction and Local Watershed Stewardship initiatives directly consider sustainability, and TDPUD is investing in groundwater management, watershed partnerships, greenhouse gas (GHG) inventories, and developing GHG reduction goals and programs.
